

**ENGINEERED PARTS  
TO SUPPORT THE  
INDUSTRIES OF  
TOMORROW.**

**GNM ENGINEERING**  
— PRIVATE LIMITED —

A **GANGANAGAR** *motors* Group Company

# ABOUT US

GNM Engineering Private Limited (GEPL) is a supplier of CNC engineered parts offering manufacturing services from design right through to volume production, and scheduled deliveries to customers all over the world.

The founding principle of GEPL is vision for great things. Our vision is to exceed expectations in quality, delivery and cost, through continuous improvement and regular feedback mechanism.

Harboring on this vision, GEPL is slowly becoming the preferred CNC Machining Partner for forward looking industries.

## IN HOUSE CAPABILITY

### MANUFACTURING

- Circular Saw's
- CNC's
- VMC's
- SPM's

### QUALITY

- Contracer
- CMM
- Roughness Tester
- Profile Projector

### OPERATIONS

- Ultrasonic Cleaning Machine
- Laser Marking Machine

## WHY CHOOSE US

- ✓ **Competitive Pricing For CNC Parts**
- ✓ **Our CNC Parts Do Not Compromise On Quality, Service Or Delivery**
- ✓ **All CNC Machined Parts Checked Before Shipping**
- ✓ **ISO 9001 Certified**

# PRECISION ENGINEERED PARTS

## INDUSTRIES

Customer-Specific Part Manufacturing is carried out for companies operating in the industrial hydraulics, automotive, utility and equipment manufacturing sectors. Extensive experience in the CNC and VMC Machining of a wide range of steels.

## CAPABILITIES

Full engineering capabilities, planning, scheduling and delivery of customer-specific parts. Experts in CNC machining, turning and milling, ensuring quality control for crucial components at all stages of the manufacturing process.

## COMPONENTS

Parts are delivered to the site “plug n play” into your manufacturing environment, managed by the GEPL team of engineers and supply chain experts located in India. GEPL is fully ISO 9001 certified.

## QUALITY

GEPL works closely with customers to understand the intricacies of parts beyond what can be written on drawings and specifications. Implementation of the highest production standards, quality control standards, testing, NPI and tooling.
